

Letter: Demand balanced management of Pryors

Posted: Tuesday, November 13, 2007 11:00 pm

Custer National Forest proposes to designate eight different routes by which I can drive my four-wheel drive to the top of Big Pryor Mountain. It proposes no routes by which I can peacefully and safely hike, mountain bike or ride a horse to the top - only motorized routes. This will make the Pryors an exclusive motor sport park dominated by ATVs.

Visit www.pryormountains.org and send a comment to the Forest Service asking for more balanced management.
